# 1. A LETTER FROM THE DIRECTORS OF THE MASTER PROGRAM

On behalf of **Alfonso X University** it is a pleasure to introduce you to the **Master program in Dynamics of Cooperation, Conflict and Negotiation in International Relations and Diplomacy** at the **Alfonso X el Sabio University**, in collaboration with the **Berg Institute** in Madrid and the **Human Rights Centre of the United Nations Mandated University for Peace (UPEACE)** in Costa Rica.

Our academic and professional project was born during our own practice in different international scenarios, nourished by our interest and need to understand the major issues and challenges in **International Law, Human Rights, Development, Peace, and International Economics**. At that time, we were postdoctoral international visiting scholars and researchers as grantees of the **Fulbright Program** in the United States. We realized that a new perspective to deal with “international problems” demanded a sophisticated approach promoting the capacity to understand the complexity of conflicts **and their multidimensional narratives– legal, social, political, economic and historic**.

**International conflict resolution needs to combine classic and traditional** foundations with alternative and innovative methods. In our opinion, a Master in International Relations should focus more on the interdisciplinary and combine a strong theoretical framework with a practical approach in order to prepare students for the realities of a future career in this area.

The aforementioned vision is the essence of this exceptional Master program, which represents a unique opportunity to receive an **integral education for a future career in NGOs, International Organizations or Commerce, Diplomacy and/or Public Service**. The program covers the wide field of International Relations, offering diverse courses in Peace and Conflict studies, Security studies, International Negotiation and Mediation, Intercultural Studies and Communication, Gender Studies, International Economics, and International Law. The guiding thread of all the courses is the **promotion of Human Rights and Sustainability**. Together with this academic penum, we deemed it necessary to encourage students to embrace the principles that shape an innovative, consistent, responsible attitude, both ethical and professional, based on **critical thinking, respect and the promotion of international diversity**.

**Ultimately, we would like to inspire our students with a sophisticated, multidisciplinary way of thinking, and to raise awareness of their leadership responsibility in the development of their capacities to provide different solutions to multiple international conflicts and challenges.**

Another important feature of the Master’s program is the **international atmosphere** of our University and Faculty of Social and Legal Sciences, whose members come from up to **27 different nations**. **Classes are conducted by experienced professors, diplomats, professionals, and civil servants, but also by military personnel and politicians**. All of them feel committed to providing their students with deep insight into international careers (par excellence). Furthermore, the composition of the participants is especially multicultural and reinforces the significance of learning and working together in a global context. All classes are held in English, making it the only European ECTS Master Program taught in English in Spain in this specific academic field. This will not only improve the students’ language skills, but also prepare them to use English as a working tool in the future.

As we are well aware of the difficulties of combining a professional life with further studies, we hold classes in evening hours to offer the participants the chance to balance work commitments with their studies.

A further special Master option is provided by several professional programs offered by the **Berg Institute** in Europe (Spain, France, Germany, Belgium, Poland, Luxemburg, and Holland) and in Palestine and Israel. These academic courses are intended to enable students to analyze and experience first-hand the context of Human Rights. In their practical approach, these courses combine **academic lectures with field trips and workshops with professional and international actors**. They complement the knowledge acquired during study sessions and allow students to create own narrative based on their direct experience. On one hand, the European program highlights the European history of integration and its legal and Human Rights system through visits to key institutions and historic places in seven countries. On the other hand, **the Israel and Palestine program** intends to give a realistic and unbiased view of the conflict and its various elements by visiting both territories and meeting relevant actors from both sides. These programs reflect the practical approach of our Master program.

If you are looking for comprehensive studies of International Relations with a realistic approach and a practical attitude, you have come to the right place. We are looking forward to hearing from you. Come to work, come to think and dare to learn –sapere aude- how to develop insights, new narratives and solutions for an immense variety of challenges.

Yours sincerely,

Prof. Dr. Juan Carlos Sainz-Borgo

Prof. Dr. Joaquín González Ibáñez

## 2. A STIMULATING ONE YEAR MASTER

We have designed the master program so the participants will not just study theory, but have a real opportunity to get job-ready.

The master program in **Dynamics of Cooperation, Conflict and Negotiation in international Relations and Diplomacy** –

**The only International Relations program taught entirely in English in Spain**

offers aspiring students and professionals the opportunity to advance their knowledge and practices under the guidance of internationally recognized academics.

Jointly developed with the **Berg Institute** and **UN University for Peace**, this innovative program aims to take the latest insights from the international community and put them in a global context. Participants acquire competences required to contribute to the development of the international cooperation and to cope with the rapid changes there underway.

This program is designed with the participants' interests in mind, with classes held in the evening from Monday to Thursday.

Taking a **practical approach**, the program provides a **sophisticated and solid theoretical background** in each module. The central idea is to apply a theoretical and practical framework to the way participants think and work within the field of international relations.

The program is structured in 15 core modules and is complemented by optional **institutional visits and academic fieldtrips in Spain, the European Union and the United States**.

For each module, participants will receive the bibliographical resources and a seminal work chosen by their respective professor. This will not only provide an enduring tool for future reference but will also contribute to the participant's ability to critically engage with the relevant academic literature.

The desired social profile for applicants is that of a student or professional with interest in International Relations issues in a broad and sophisticated sense. Applicants shall have the motivation, work capacity, tolerance, and the open mind expected in a program of this kind. The encounter of different nationalities in the master is in itself a crucial part of the program as it creates a perfect group to discuss the content from an intercultural point of view.

## 6.2. FORMER STUDENT'S STUDIES

## 6.3. FORMER STUDENTS' TESTIMONY

**Vilte Pupkeviciute  
(Lithuania)**

Worker at World Tourism  
Organization

"It is very exciting to hear professionals sharing their deep knowledge, work experiences and giving their point of view. Listening to these very hard working and successful people and being able to ask for advice was, for me personally, the biggest motivation during my studies. Moreover, during the whole study period I really felt the support not only from the professors, but also from the program directors and coordinators. Studying in a small group with different people from all over the world is another just as much exciting part. We've learned a lot from each other.

A paragraph is not enough to tell you all about my wonderful experience studying at this program. But to wrap it in one sentence I would like to say that choosing UAX to do my Master's program in IR field was surely the right thing to do."

**Juan Cambreleng  
Contreras (Spain)**

Lawyer and Internationalist

"Studying the Master in Internal Relations at UAX has been a very enriching experience. The courses given by top professionals and professors from various nationalities and fields enable the students to study in depth all aspects relating to International Relations. Moreover, students belong to different academic and professional areas, and represent many nationalities, thus creating a very interesting multicultural environment."

**Jesús Gavilán  
Hormigo (Spain)**

Lawyer

"If you don't know why you should study a master degree in International Relations, I would tell you that it is a great chance to improve your knowledge about different matters -among them, international law, economics, politics, human rights and international cooperation- which allows you to approach many fields, national and internationally, where you will can develop yourself as lawyer, diplomat, consultant, researcher, etc.

Furthermore, Alfonso X el Sabio University, one of the best private universities in Spain, provides a wide range of academic and professional options to complete this holistic experience, a lifetime experience that I recommend to you."

## Juan Sebastián García (Colombia)

NGO Worker

"The experiences, knowledge and scope acquired during the Master are amazing. It allows you to embrace all the theories but more important it enhances your global and practical perspective due to the incredible and really well prepared professors. One of the most important things, in my opinion, is that the Master allows you to understand the critical and juncture moments through different perspectives because of the discussions and sessions with students and professors from all over the globe and different academic backgrounds. The multicultural and Human Rights approach leads the Master throughout the different subjects which gives it a unique and special emphasis. It has been one of my best experiences, both in an academic and personal way."

## Nnamdi Nze (Nigeria)

Diplomat

"It is indeed a very wonderful and valuable experience. Classes are related to current and contemporary issues and it has really helped me in my job. I recommend everybody to join this program!"

## Andrea Balda (Ecuador)

Scholar

"It was actually a happy coincidence that led me to UAX, serendipity if you will, and I am extremely thankful it happened. The program offers unparalleled opportunities for networking; incredible professors, both academics and professionals top in their fields; and, magnificent trips where you can put into practice the theory learned throughout. I am fully satisfied with my experience in the program, it was an amazing journey"

"All the inhabitants of this world of ours should not live differentiated by their respective rules of justice into separate cities and communities, but we should consider all men to be of one community and one polity, and that we should have a common life and an order common to us all, even as a herd that feeds together and shares the pasturage of a common field."
